

PERSONAL STATEMENT

I'm a Freelance web designer since 2013, formerly I worked on Open Source teaching on a PA project. I'm experienced in video editing, industrial 3D design and journalism (blogging), my education was classical (latin and ancient greek) and artistic (accademy of good arts).

I often work in autonomy on a communication concept, I'm keen on journalism and illustration, that's why I choose to enroll on the Alberto Cairo data visualization MOOC two years ago. I often work online with journalists, my last expertise was about building MOOC with Moodle.

Go to www.jeeltcraft.com to see my last works and start a partnership.

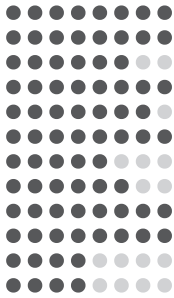

MY SPECIALITIES

DESIGN SKILLS

01 Computer

- Google charts
- Data Mining
